

From Responsible Research and Innovation to Open Science

Udine (IT) - January 30/31

An outlook on RRI from a business and policy-making perspective.

Target audience: max 20 people (scientists, R&D managers, entrepreneurs, policymakers).

Approach: Mix of theory and practical workshops

Responsible Research and Innovation has emerged as a cross-cutting theme within H2020, with the aim of promoting a reflexive, inclusive, and anticipatory approach to research and innovation.

In this workshop, which will focus on business and policy applications of RRI, you will learn how to:

- maximize the impact of EU-funded projects, in an RRI perspective;
- implement RRI in your research, business or policy activity;
- engage with firms and/or policymakers, to foster sustainable innovation.
